

Process of delivery:

- The office will contact you to verify your unit once your deposit has been received.
- Your unit will be delivered within 2 to 6 weeks after your property is fully prepared for installation (including foundation, permits, etc.).
- For concrete foundations, the unit will be delivered approximately 2 weeks after the 28-day curing period.
- For ground, gravel, or asphalt foundations, the foundation should be no more than 3 inches off level from the highest point to the lowest point in the area of construction.
- The office will request photos of your property to assist the installers in locating your address.
- You will be notified of the week during which installation is scheduled.
- Once the installation week is confirmed, the office will contact you to finalize the specific day of installation.
